

YOUR BUSINESS.
PROTECTED.
NO MATTER WHAT.

SOUTHWEST FLORIDA BUSINESS HURRICANE TECH PREPAREDNESS GUIDE

Essential technology steps to protect your business, stay connected, and keep operations running.

BACK UP YOUR DATA

Ensure all critical files are backed up automatically and stored securely offsite or in the cloud.

UPGRADE YOUR PHONE SYSTEM

Use cloud-based phones that can be routed to cell phones and continue working even if your office is down.

ENABLE REMOTE ACCESS

Make sure your team can securely access the tools, files, and systems they need from anywhere.

STRENGTHEN CYBERSECURITY

Enable multi-factor authentication, keep software updated, and remind employees to watch for scams.

PROTECT EQUIPMENT

Use surge protection and UPS battery backups for critical systems and internet equipment.

TEST YOUR BACKUPS

Regularly test backups to confirm your data can be restored quickly when you need it most.

COMMUNICATE YOUR PLAN

Make sure your team knows the plan, key contacts, and how to stay in touch.

PLAN FOR INTERNET OUTAGES

Consider a backup internet solution like cellular failover to stay connected if your primary service is down.

SECURE IMPORTANT DOCUMENTS

Store essential documents digitally and back them up so they're accessible anytime, anywhere.

REVIEW VENDOR CONTACTS

Keep an updated list of your IT provider, internet, phone, and other critical vendor contacts.

PREPARATION TODAY CAN PREVENT MAJOR DOWNTIME TOMORROW.

A little planning now can protect your business, your data, and your peace of mind.

LET'S MAKE SURE YOUR BUSINESS IS READY FOR WHATEVER COMES OUR WAY.
